WELCOME TO GENEVA

Dear colleagues

Welcome to the WCPT Congress 2019 and to Geneva.

For those who have attended a WCPT Congress in the past, it will be a chance to reconnect with old friends and colleagues, and gain new knowledge and ideas. For those of you attending your first congress, we can tell you it will be unforgettable. We hope you'll be inspired to expand your knowledge and build connections.

The Congress Programme Committee has created an excellent programme, which offers a range of engaging and thought-provoking issues in a wide variety of session formats. Whether you're a student at the start of your career or a more established clinician, manager, educator, researcher or policy maker, you'll find plenty to inform, educate, and entertain you during congress.

The programme celebrates and showcases our profession and its achievements in patient care, service delivery, and evidence base. We know how much congress delegates value networking opportunities and the programme offers more than 30 networking sessions.

Congress is where the world of physical therapy meets, and it is the people who attend congress who give the event its sense of global professional unity. As we at WCPT have said on many occasions: 'We meet, we connect, we share, we talk, we laugh, we dine, we create lasting friendships – and because of that, we are better.'

We thank all member organisations, regions and subgroups who ensure WCPT truly represents the global community.

But, most of all, we thank you. Every congress has welcomed the world's most diverse selection of committed physical therapists – wherever they practise and wherever they may be in their individual careers.

Thank you for your part in making this year's congress fun, fulfilling, and unforgettable.

We hope you will be inspired.

Emma K Stokes
WCPT President

Pia Fankhauser
President ad interim, physioswiss

CONGRESS PARTNERS

PARTNER FOR LIFE

Enraf-Nonius is market leader in the world of technological solutions for rehabilitation and physiotherapy. We deliver products and projects of the highest quality according to the most advanced techniques and make these products available world-wide via our international distributor's network. By handling the highest possible level of quality and service, we enable health centres to look after their patients and clients in the most effective and efficient way, and therapists to guarantee their treatments on a daily basis. Enraf-Nonius contributes to a longer, healthier and happier life.

Stand I6

A successful therapy begins in the patients' minds. We firmly believe they can reach their goals and regain quality of life. This is what we work for at the Swiss medtech company Hocoma, with technologies and ideas that enable independent exercise, create maximum motivation and challenge people to take courage and support their hopes with personal achievements.

Our robotic and sensor-based devices offer solutions for intensive gait therapy (Lokomat®, Andago®), functional therapy of the upper extremities (Armeo®), robotic mobilization and functional electrical stimulation in early rehabilitation (Erigo®) and functional movement therapy for low back pain treatment (Valedo® Therapy Concept).

Stand L2

Kiso is a company that markets electromyography instruments for the clinical practice and sports-science. Biofeedback gives the clinician an understanding for each customer's specific problem. Numbers are put on the performance giving objective results for status and progress. With biofeedback the optimal exercises can be found for the problem. The customer understands how to do the exercise correctly through visualization and gets motivated. This

individualized approach results in a faster and better healing. Similar methods are used in sports for injury-prevention, fit-for-fight-evaluation and maximizing the effect of training program. Better insight and targeted exercises are particularly interesting for a complex joint as shoulder where problems can become chronic. During the conference an industrial workshop will illustrate an application related to shoulder problems.

Stand E5

At MyoSwiss, our mission is to improve the quality of life for people with mobility impairments through innovative assistive technologies.

We are developing the MyoSuit, an innovative training device, for people with mobility impairments. It is a wearable robotic garment suit, that combines robotic and functional textiles. Using artificial intelligence and lightweight materials, we enable personalized and functional training for people with mobility impairments. Simple and anywhere they want. This lightweight device acts like an added layer of muscle, giving people the newfound strength to get up from a chair or navigate a flight of stairs. We are closely working together with health care professionals in Switzerland and France to better anticipate and advocate the needs of their patients.

Stand 09

MindMaze has developed a breakthrough computing platform for intuitive human-machine interfaces. The MindMotion™ platform provides motivating gamified activities built on evidence-based neurorehabilitation principles, designed to increase rehab dose after a neurological incident. The devices are FDA cleared and mobile solutions to engage

patients in continuing therapy as they transition from hospital to home.

Stand S10

OG Wellness Technologies Co., Ltd. is a Japanese manufacturer of high-quality physiotherapy and rehabilitation equipment, as well as assisted bathing systems for institutional use.

At WCPT 2019 two of our most innovative physiotherapy products are being exhibited: 1) IVES, an EMG-based Functional Electrical Stimulation device that emits real-time stimulation proportionate to the detected EMG; 2) Orthotrak Lasedia, a cervical & lumbar traction chair that automatically reclines to the supine position for traction then returns the patient to the seated position when the traction is finished.

Stand C4

The Polish Chamber of Physiotherapists is a professional self-governing body associating and representing all physiotherapists in Poland with the right to practice their profession. The Polish Chamber of Physiotherapists grants and oversees physiotherapy licences and otherwise acts as the competent authority responsible in Poland for the profession of physiotherapy, which is the profession of public trust. The profession of physiotherapy is in Poland recognized as an independent medical profession, which means that a

physiotherapist can independently provide medical services in the area of physiotherapy. The Polish Chamber of Physiotherapists, representing around 60,000 physiotherapists, whose amount is constantly increasing, places priority on patient safety and enhances the development opportunities of physiotherapists.

Stand G12

PelviPower is a new breakthrough concept from Switzerland that comfortably trains your pelvic floor and the surrounding muscles purposefully and effectively. It's a non-invasive method, you keep your clothes on, conveniently sitting down.

The holistic concept combines state-of-the-art medical technology with targeted support for individual training. PelviPower combines best of both; magnetic field therapy with biofeedback training methods.

VASYLI[®]
MEDICAL

Vasyli Medical orthotics not only benefit patients worldwide, they also provide healthcare professionals with new ways to enhance the profitability of their practices through effectively retailing Vasyli orthotics.

- World wide distribution.
- Trusted for over 35 years.
- Affordable, medical grade orthotics.
- Heat moldable in clinic with posting additions.

VIONIC[®]

Walk. Move. Live.®

VIO • MOTION[™]
SUPPORT

Vio-Motion Support is concealed within every Vionic shoe, supporting every step from the ground up so you can confidently move in unmatched comfort. Full biomechanical contact hugs your foot's natural curves, providing essential support in all of our casual, dress and active shoes and slippers.

Vionic Supports you, so you can walk. Move. Live.

HEALTH AND WELLBEING @ CONGRESS

SATURDAY

- 06:30** **5k run:** led by the Je cours pour ma forme team
Join fellow delegates for a 5km run, with warm-up and stretch, before taking in some of the sights of Geneva
Meet: outside Palexpo main entrance
-
- 10:15 – 10:30** **Mindfulness:** with Axelle Mokry
Exhibition Hall: exercise area
-
- 12:30 – 12:50** **Dance and movement:** join physioswiss colleagues who will get you moving
Exhibition Hall: exercise area
-
- 15:30 – 15:45** **Pilates for runners:** with Biljana Kennaway
Exhibition Hall: exercise area
-
- 20:00** Join one of the Harmony Geneva Marathon 10km options
Register online: www.harmonygenevemarathon.com

SUNDAY

- 06:30** **Parcours vita:** want to exercise on a fitness trail in a natural environment?
Where? Try this option just outside the conference centre (*this is a self-guided activity*)
-
- 10:15 – 10:30** **Yoga:** with Lina Brunoro
Exhibition Hall: exercise area
-
- 12:30 – 12:50** **Dance and movement:** join physioswiss colleagues who will get you moving
Exhibition Hall: exercise area
-
- 15:30 – 15:45** **Pilates for cyclists:** with Biljana Kennaway
Exhibition Hall: exercise area
-
- 18:00** **Guided walking tour of the Old Town**
Meet: In front on the Parc des Bastions main entrance, bus/tram stop Place de Neuve.
[Bus route 5 from Palexpo, 14 stops]

MONDAY

- 06:30** **Tai Chi:** with Christian Arnold
Join delegates for some fresh air and Tai Chi. This will be outside, whatever the weather!
Meet: outside Palexpo main entrance
-
- 10:15 – 10:30** **Mindfulness:** with Erwan Treguer
Exhibition Hall: exercise area
-
- 12:30 – 12:50** **Dance and movement:** join physioswiss colleagues who will get you moving
Exhibition Hall: exercise area
-
- 15:20 – 15:35** **Yoga:** with Lina Brunoro
Exhibition Hall: exercise area

 **Water quality:** Switzerland's water consistently ranks #1 in the world with its mineral content equal to commercially bottled water.
Please bring a reusable water bottle with you and fill it up from any tap to enjoy the local water and help us keep congress sustainable.

INDUSTRY WORKSHOPS

Several industry workshops are taking place during congress break times. Take this opportunity to listen to some cutting-edge thinking from some of our industry partners.

The industry workshops are located just inside the exhibition hall at Entrance 3, on the left.

SATURDAY	10:10 - 10:35	Enraf-Nonius BV	Clinical experience with the robotic Occiflex for neck and head pain (IW-02)
	12:25 - 12:50	Polish Chamber of Physiotherapists	ICF in clinical practice (IW-04)
	13:00 - 13:25	OG Wellness Technologies Co Ltd	EMG-based FES with IVES (Integrated Volitional-control Electric Stimulator) (IW-06)
SUNDAY	10:10 - 10:35	Pontemed AG	Power up your pelvic floor (IW-05)
	12:25 - 12:50	MindMaze	Can the therapist be replaced? (IW-07)
	13:00 - 13:25	Kiso ehf	EMG as a clinical tool: shoulder example (IW-03)
	15:25 - 15:50	Hocoma AG	Advanced technologies: How digitalization will change neurorehabilitation (IW-01)

Networking session, Rooms R+S
Saturday 07:15-18:15

CLOSING CEREMONY: join us in Room A + B at 17:30 on Monday 13 May to celebrate the congress and look back at key highlights. Awards will be announced and presented for outstanding abstracts. We will also be saying farewell to our Swiss host and handing over to the Emirates Physiotherapy Society, the host for the WCPT Congress 2021 in Dubai.

FLOOR PLAN: UPPER LEVEL

FOR FASTER RECOVERY

FEEL THE PERFORMANCE. LymphaTouch[®] is an easy to use negative pressure medical device for healthcare professionals in the fields of oncology, orthopaedics, sports, neurology and MSD.

“LymphaTouch[®] has cut down the treatment time of lymphedema patients with fibrous skin by a week, sometimes even two weeks compared to just using manual therapy.

–Kathryn McGinty, PTA,CLT, Johns Hopkins Hospital

“Clinically tested medical device used by more than **1000** therapists around the world”
